

INFANT CARE SYSTEM
Neonate Bilirubin Phototherapy Equipment

MitirBBP4000B Neonate Bilirubin Phototherapy Equipment

Features:

- LCD display shows time information, lighting intensity, and skin temperature.
- With white LED lights for easy examination
- With skin temperature sensor to monitor baby' s skin temperature
- Internal fan to reduce the heat during operation
- Programmable system controller to set different lighting intensity for different time

Specifications

Model	MitirBBP4000B
Bilirubin radiancy (4cm)	3600 μ w/cm ² (60 μ w/cm ² /nm)
Lighting intensity	33%,67%,100%
White light	Yes
Radiant space	360 × 210 (mm × mm)
Power	≤ 100VA
Wave length	400nm ~ 550nm
Radiant uniformity	> 0.4
Therapy time set	0~99h59m
Temperature monitor range	30 ~ 40°C

Neonate Bilirubin Phototherapy Equipment

MitirBBP-2000B

MitirBBP2000B(LED)

- Easily move with wheels
- LCD display shows time information, lighting intensity
- With white LED lights for easy examination
- Programmable system controller to set different lighting intensity for different time

MitirBBP3000B(LED)

MitirBBP-3000B

Specifications

Model	MitirBBP-2000B	MitirBBP3000B
Bilirubin radiancy (40cm) Bilirubin radiancy (50cm)	3750 μ w/cm ² (62.5 μ w/cm ² /nm) 3200 μ w/cm ² (53 μ w/cm ² /nm)	
Lighting intensity	33%,67%,100%	
White light	Yes	
Power	\leq 60VA	
Wave length	400nm ~ 550nm	
Radiant space	400 × 250mm	
Radiant Uniformity	> 0.4	
Therapy time set	0~99h59m	
Height range	1350mm ~ 1650mm	-

Neonate Bilirubin Phototherapy Equipment

MitirBBP400A(4tubs) MitirBBP400B(5tubs)

- Available stand pole up-down adjustment
- Available angle adjustment 0° , 30° , 60°
- Wave length: 400-500 nm
- Fitted with any infant bed and incubator
- 4 tubes or 5 tubes

MitirBBP1000B(LED)

Phototherapy unit can be put on the top of incubator
